Larmor, le 15/08/2016

Dear Dr Sakellariou,

On the 10/06/2016, my husband, François Trouvé, has been admitted to the Mediterraneo Hospital. He had fractured his left leg in the island of Milos : tibia and fibula, near the knee. You put him an external fixation and he stayed 10 days in your service because of his blood's problem.

I would like to thank you and your team for the excellent care he received at Mediterraneo Hospital. I am very grateful in particular to :

- You and Dr Mimidis (?) who often accompanied you. Thank you for your brilliant expertise and for your patience with my poor english.
- the hematologist doctor who speaks french !
- the physiotherapists, efficient and encouraging
- the experienced nurses, always in a good mood
- and, more generally to all the staff, kind and competent.

My husband is now recovering smoothly from his accident. He had surgery and the external fixation has been removed. He can now walk a little bit with crutches.

In spite of our holidays' catastrophic interruption, we don't keep a bad memory of Greece, and, it is partly, thanks to you and your excellent Hospital and the great assistance you provided.

Receive, dear Dr Sakellariou, my best regards

Claude Trouvé
